

Superstore Analytics Dashboard

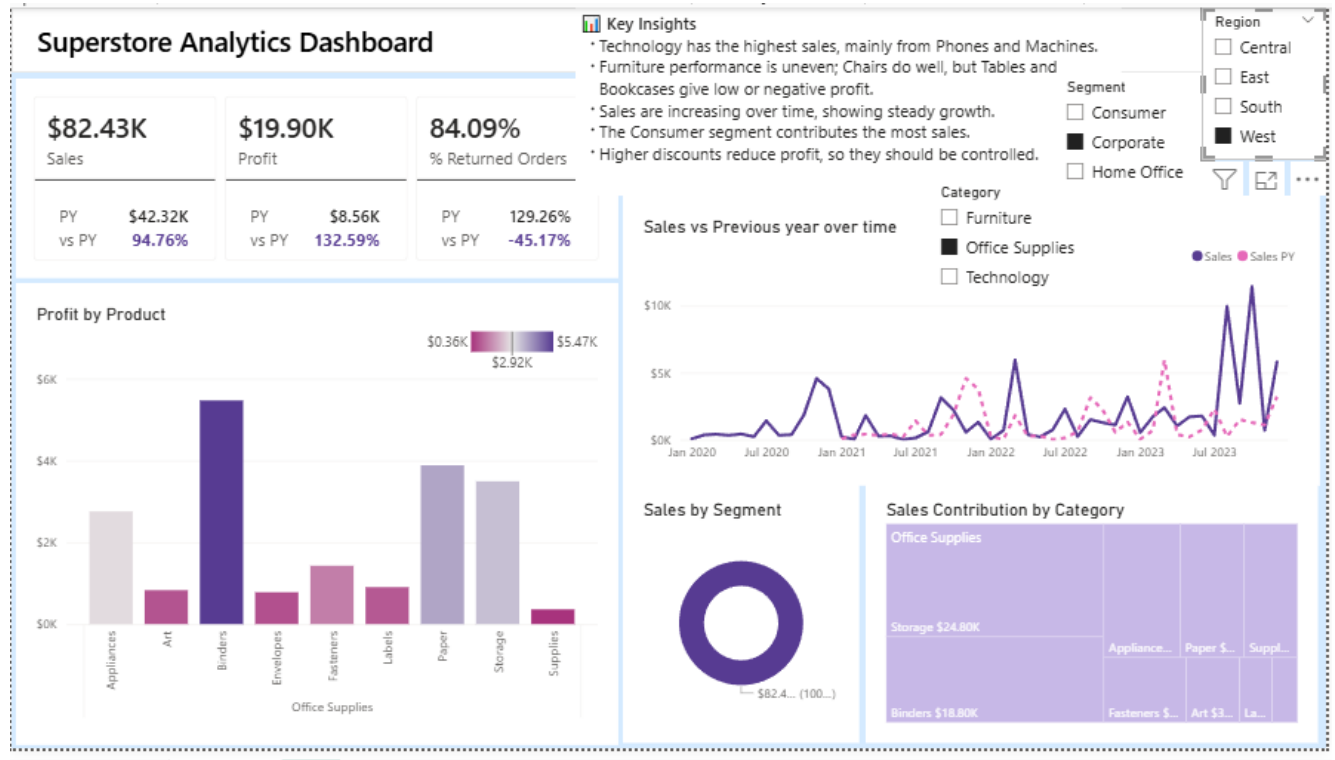

Objective

The objective of this project is to design an interactive dashboard using Power BI to analyze sales, profit, and business performance for stakeholders.

Dataset Information

- Dataset: Superstore Sales Dataset
- Data Type: Sales/Financial Data
- Columns Used:
 - Sales
 - Profit
 - Category
 - Segment
 - Region
 - Order Date

Dashboard Overview

The dashboard contains KPI cards, charts, treemap, donut chart, and slicers for interactive business analysis.

Visualizations Used

Visualization	Purpose
KPI Cards	Show Sales & Profit
Line Chart	Sales Trend Analysis
Bar Chart	Product Profit Comparison
Donut Chart	Segment Contribution
Treemap	Category Contribution
Slicers	Interactive Filtering

Key Insights

- Technology category has the highest sales.
- Corporate segment contributes significant revenue.
- Sales trend is increasing over time.
- Interactive slicers improve dashboard analysis.

Conclusion

This dashboard helps stakeholders understand business performance through interactive visualizations and supports data-driven decision making.
